

**NAVY CHILDREN SCHOOLS**  
**SPLIT UP SYLLABUS**  
**COMPUTER SCIENCE – CLASS XI**

**YEAR -2024-25**

**1. Distribution of Marks:**

Unit No.	Unit Name	Marks	Periods	
			Theory	Practical
I	Computer Systems and Organisation	10	10	10
II	Computational Thinking and Programming - 1	45	80	60
III	Society, Law and Ethics	15	20	---
	Total	70	110	70

**2. Monthly Split up syllabus:**

Month	Chapter	Content/Practical/Assignment	Practical / Projects
June/ July	1. Computer Systems and Organisation  2. Boolean Logic	<ul style="list-style-type: none"> <li>Basic Computer Organisation: Introduction to computer system, hardware, software, input device, output device, CPU, memory (primary, cache and secondary), units of memory (bit, Byte, KB, MB, GB, TB,PB)</li> <li>Types of software: system software (operating systems, system utilities, device drivers), programming tools and language translators (assembler, compiler &amp; interpreter), application software</li> <li>Operating system (OS): functions of operating system, OS user interface</li> <li>Boolean logic: NOT, AND, OR, NAND, NOR, XOR, truth table, De Morgan's laws and logic circuits</li> </ul>	Identifying various components of Computer  Making logical gates and proving theorems
	3. Number System  4. Encoding Schemes	<ul style="list-style-type: none"> <li>Number system: Binary, Octal, Decimal and Hexadecimal number system; conversion between number systems.</li> <li>Encoding schemes: ASCII, ISCII and UNICODE (UTF8, UTF32)</li> </ul>	Number System Conversion
August	5. Introduction to problem solving	<ul style="list-style-type: none"> <li>Steps for problem solving (analysing the problem, developing an algorithm, coding, testing and debugging). Representation of algorithms using flow chart and pseudo code, decomposition.</li> </ul>	Writing Algorithms and preparing flowcharts for simple

	6. Getting Started with Python	<ul style="list-style-type: none"> <li>Familiarization with the basics of Python programming: Introduction to Python, features of Python, executing a simple "hello world" program, execution modes: interactive mode and script mode, Python character set, Python tokens (keyword, identifier, literal, operator, punctuator), variables, concept of l-value and r-value, use of comments.</li> </ul>	<p>problems</p> <p>Launching and working with python IDLE.</p>
	7. Python Fundamentals & Data Handling	<ul style="list-style-type: none"> <li>Knowledge of data types: number (integer, floating point, complex), boolean, sequence (string, list, tuple), none, mapping (dictionary), mutable and immutable data types</li> <li>Operators: arithmetic operators, relational operators, logical operators, assignment operator, augmented assignment operators, identity operators(is, is not), membership operators(in, not in)</li> </ul>	<p>Working in Interactive and script modes</p>
	8. Python Expressions & Statements	<ul style="list-style-type: none"> <li>Expressions, statement, type conversion &amp; input/output: precedence of operators, expression, evaluation of expression, python statement, type conversion (explicit &amp; implicit conversion), accepting data as input from the console and displaying Output</li> </ul>	<p>Use of operators, framing &amp;evaluating expressions, type conversions, etc in Interactive mode</p>
	9. Errors & Debugging	<ul style="list-style-type: none"> <li>Errors: syntax errors, logical errors, runtime errors</li> </ul>	
	10. Flow of control: sequential & conditional flow, Loops	<ul style="list-style-type: none"> <li>Flow of control: introduction, use of indentation, sequential flow, conditional and iterative flow control</li> <li>Conditional statements: if, if-else, if-elif-else, flowcharts, simple programs: e.g.: absolute value, sort 3 numbers and divisibility of a number</li> <li>Iterative statements: for loop, range function, while loop, flowcharts, break and continue statements, nested loops, suggested programs: generating pattern, summation of series, finding the factorial of a positive number etc</li> </ul>	<p>Basic Programs, Programs that require decision making.</p> <p>Programs based on loops</p>
Sept	11. Strings in Python	<ul style="list-style-type: none"> <li>Strings: introduction, indexing, string operations (concatenation, repetition, membership &amp; slicing), traversing a string using loops, built-in functions: len(), capitalize(), title(), lower(), upper(), count(), find(), index(), endswith(), startswith(), isalnum(), isalpha(), isdigit(), islower(), isupper(), isspace(), lstrip(), rstrip(), strip(), replace(), join(), partition(), split()</li> </ul>	<p>Programs based on string manipulations</p>

Oct/Nov	12.Lists	<ul style="list-style-type: none"> <li>• Lists: introduction, indexing, list operations (concatenation, repetition, membership &amp; slicing), traversing a list using loops, built-in functions: len(), list(), append(), extend(), insert(), count(), index(), remove(), pop(), reverse(), sort(), sorted(), min(), max(), sum(); nested lists, suggested programs: finding the maximum, minimum, mean of numeric values stored in a list; linear search on list of numbers and counting the frequency of elements in a list.</li> </ul>	Programs based on list operations
	13.Tuples	<ul style="list-style-type: none"> <li>• Tuples: introduction, indexing, tuple operations(concatenation, repetition, membership &amp; slicing), built-in functions: len(), tuple(), count(), index(), sorted(), min(), max(), sum(); tuple assignment, nested tuple, suggested programs: finding the minimum, maximum, mean of values stored in a tuple; linear search on a tuple of numbers, counting the frequency of elements in a tuple.</li> </ul>	Programs based on tuples
	14. Dictionary	<ul style="list-style-type: none"> <li>• Dictionary: introduction, accessing items in a dictionary using keys, mutability of dictionary (adding a new item, modifying an existing item), traversing a dictionary, built-in functions: len(), dict(), keys(), values(), items(), get(), update(), del(), clear(), fromkeys(), copy(), pop(), popitem(), setdefault(), max(), min(), count(), sorted(), copy(); suggested programs : count the number of times a character appears in a given string using a dictionary, create a dictionary with names of employees, their salary and access them</li> </ul>	Programs based on dictionaries

Dec/Jan	15. Introduction to Python Modules	<ul style="list-style-type: none"> <li>• Introduction to Python modules: Importing module using 'import &lt;module&gt;' and using from statement, importing math module (pi, e, sqrt(), ceil(), floor(), pow(), fabs(), sin(), cos(), tan()); random module (random(), randint(), randrange()), statistics module (mean(), median(), mode()).</li> </ul>	Programs importing and using modules.
Jan/Jan	16. Society, Laws and Ethics	<ul style="list-style-type: none"> <li>• Digital Footprints</li> <li>• Digital society and Netizen: net etiquettes, communication etiquettes, social media etiquettes.</li> <li>• Data protection: Intellectual Property Right (copyright, patent, trademark), violation of IPR (plagiarism, copyright infringement, trademark infringement), open source softwares and licensing (Creative Commons, GPL and Apache)</li> <li>• Cyber-crime: definition, hacking, eavesdropping, phishing and fraud emails, ransomware, preventing cyber crime</li> <li>• Cyber safety: safely browsing the web, identity protection, confidentiality, cyber trolls and bullying.</li> <li>• Safely accessing web sites: malware, viruses, Trojans, adware</li> <li>• E-waste management: proper disposal of used electronic gadgets</li> <li>• Indian Information Technology Act (IT Act)</li> <li>• Technology &amp; Society: Gender and disability issues while teaching and using computers.</li> </ul>	Understanding of Cyber laws and online ethics including safety measures to protect data and information available online
Jan/Jan		Revision for NES Common Final Exam
